

WATERTORQUE

OUR CAPABILITIES

Company Overview

Over 20 years' experience in the water industry has made Watertorque what it is today:

An organisation passionate about developing efficient and sustainable water infrastructure.

Our key mission is to provide tailored solutions and make water work for you. We are passionate about what we do and take great pride in delivering our principal value - INTEGRITY!

Watertorque has two convenient West Australian sites that allow us to offer a complete service to the WA market. Our head office is based in Muchea, just one hour north of Perth. Our second office is located in Broome and services the North West, Pilbara, Kimberley and Gascoyne regions.

Our successful affiliations in combination with ongoing training and skill enhancements ensure we have access to the best brands and technology available in the market. This allows Watertorque to deliver what we do best - Water!

Consultancy & Design

Sales & Advice

Service & Installation

Pivot Irrigation

Watertorque is an authorised West Australian dealer for Valley Irrigation. Valley are the **worldwide leader in precision irrigation**. They founded the pivot market with centre pivots, linear and corner irrigation equipment utilising advanced management software. Our capability starts from providing professional consultation and design right through to project management, installation and servicing to the highest standard.

Let Watertorque manage your pivot project today to see our difference!

Water Tanks

Watertorque is a Master Dealer for Pioneer Water Tanks, Australia's premier tank company who leads the way in water. Watertorque is able to take on tank projects from 10kl right up to 500kl for domestic, rural, commercial and fire tanks. We cover all the applications you require from a tank including but not limited to:

- stormwater,
- filtration,
- pumps and solar pumping,
- irrigation and
- much more.

Our teams are fully certified through Pioneer Centre of Excellence and Watertorque has proudly been awarded State **and** National Dealer of the Year multiple times. Rest assured that when it comes to water tanks, you are in quality hands with a quality product.

Irrigation and Water Management

Watertorque has dedicated consultants who professionally design, consult, construct and manage your water project. The Irrigation and Water Management sector of our company has the capability to handle:

- mining applications
- commercial projects
- large agricultural ventures
- hobby farms
- all water applications

With over 20 years' experience in offering customised solutions you can be assured a high standard of product and service is met.

Solar and Pumping

Watertorque's experience ensures we select the most clean, reliable and efficient solution for your project. As dealers for all the major brands - Grundfos, Lorentz, Lowara and Davey to name a few - we combine quality products with customised solutions and complete management for your water project.

We are in key demand for solar pumping in WA offering a full range of solar array and performance options depending on your specifications and needs.

Let us show you ways to reduce your yearly operation and running costs.
